

Community Consultation
~~Century John Marshall High School~~
~~March 6th February 10, 2004~~

Please circle your answers

1. Would you support a study such as the one described at this meeting being conducted in this community, specifically, a study in which severely injured and bleeding patients would be enrolled without giving their informed consent?

☒ Yes

☐ No

2. If you were severely injured and bleeding and were being treated by the paramedics in your community, would you wish to be excluded?

☐ Yes

☒ No

3. If a family member of yours were severely injured and bleeding and were to be treated by the paramedics, would you want him or her to be excluded from this study?

☐ Yes

☒ No

4. Do you have any comments or concerns you wish to share with the investigators?

-----OPTIONAL-----

Age: 31

Ethnic background: white

Gender: Male ☐ Female ☒

Thank you for your participation today.

1. Would you support a study such as the one described at this meeting being conducted in this community, specifically, a study in which severely injured and bleeding patients would be enrolled without giving their informed consent?

☒ Yes

☐ No

2. If you were severely injured and bleeding and were being treated by the paramedics in your community, would you wish to be excluded?

☐ Yes

☒ No

~~3. If a family member of yours were severely injured and bleeding and were to be treated by the paramedics, would you want him or her to be excluded from this study?~~

~~☐ Yes~~

~~☒ No~~

4. Do you have any comments or concerns you wish to share with the investigators?

-----OPTIONAL-----

Age: 84

Ethnic background: CAUCASIAN

Gender: Male ☒ Female ☐

Thank you for your participation today.

Please circle your answers

1. Would you support a study such as the one described at this meeting being conducted in this community, specifically, a study in which severely injured and bleeding patients would be enrolled without giving their informed consent?

☒ Yes

☐ No

2. If you were severely injured and bleeding and were being treated by the paramedics in your community, would you wish to be excluded?

☐ Yes

☐ No

If saline alone would have done the job I see no reason to take on the increased risk of infection. If given only when blood would have been needed it would be fine.

3. If a family member of yours were severely injured and bleeding and were to be treated by the paramedics, would you want him or her to be excluded from this study?

☒ Yes

☐ No

4. Do you have any comments or concerns you wish to share with the investigators?

I don't think you should use UNINFORMED CONSENT to increase patient risk of infection unless the subject would be at significant risk using saline alone. For example starting an IV can become almost routine without any real analysis.
